1 INTRODUCTION. Developments in health care, like a growing number of patients with chronic diseases, an increased complexity of patients, a stronger focus on person-centred care and a demand for less institutionalized care ask for well-trained master level-educated nurses operating as partners in integrated care teams, with leadership qualities at all levels of the healthcare system.

A photonic wood with high lignin content is fabricated via an in situ, rapid, and scalable process that involves the photocatalytic oxidation of native lignin in wood by H₂O₂ and UV light. The resulting photonic wood features a unique hierarchical microstructure, high mechanical strength, excellent water stability, remarkable optical properties and designable patterning capability.
